Sara AI

Real-time price predictions for Crypto
Assets & Precious Metals. 🚀

https://SaraPredicts.com

team@SaraPredicts.com

🎯 Problem 1

Most traders lose.

Not because of lack of effort—but because they trade emotionally, not probabilistically.

They chase hype. Panic in red candles. Overtrade.

And most tools? Built for legacy institutions, not for high-velocity decision-making.

🎯 **Problem 2**

Institutions and sophisticated traders face a different problem:

They need faster, more explainable, and accurate signals - live.

Most AI tools are black-box, laggy, or overfit for backtests - not live trading.

🎯 The solution: Sara AI

SARA delivers 10 & 60 minute probability-weighted price predictions for crypto assets and precious metals.

She's powered by 3 proprietary models: Pancake, Tiramisu, and Cheesecake - each optimized for different market regimes.

As of 12pm *on 25 April 2025*, Sara AI has made **84,832 predictions** with an **accuracy of 99.43%** and a Mean Absolute Percentage Error (MAPE) of **0.57%**.

🎯 Crypto9 Index by Sara AI

The Crypto9 Index by Sara AI 🚀 simulates an investor who put $100 equally across 9 major cryptos on Feb 22, 2025.

Updated every 10 minutes, it reflects how that portfolio performs in real time.

No noise, no leverage, just pure price action.

https://SaraPredicts.com

Crypto9 Index by Sara AI

Tracks how $100 split across 9 major cryptos on Feb 22, 2025, performs in real time (AAVE, BNB, BTC, CAKE, ETH, LTC, SOL, UNI, XRP).

Assets Tracked by the Crypto9 Index by Sara AI

Aave, Bitcoin, Binance, Ethereum, Litecoin, PancakeSwap, Solana, Uniswap, and Ripple.

AAVE $136	BTC $84,141	BNB $587
ETH $1,572	LTC $74	CAKE $1.78
SOL $132	UNI $5.12	XRP $2.07
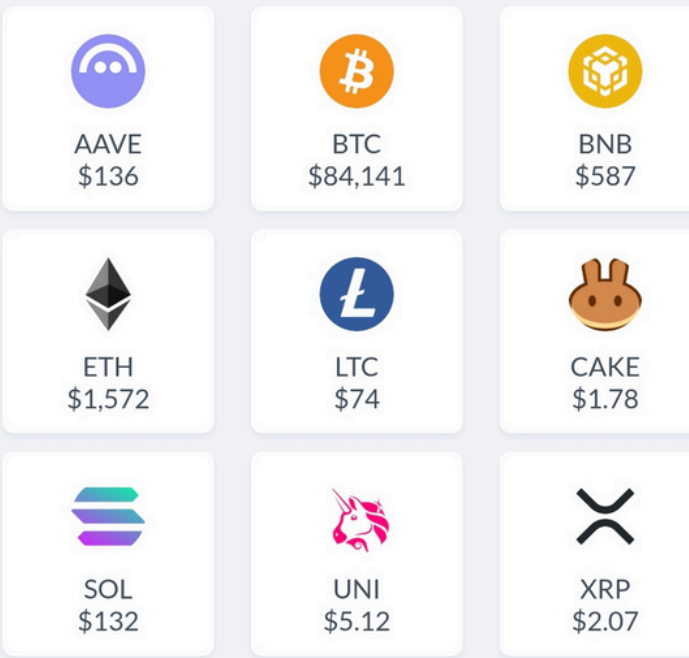

How the Crypto9 Index by Sara AI is calculated

$$\text{Index}_t = \frac{\sum_{i=1}^{9}(U_i \cdot P_{i,t})}{\text{Initial Value}} \cdot \text{Base Value}$$

● U_i: Units of asset i bought with $11.11 on Feb 22, 2025 (i.e., $\frac{\$11.11}{P_{i,0}}$).

● $P_{i,t}$: Price of asset i at time t.

● Initial Value: $100 (sum of $11.11 × 9).

● Base Value: 100 (starting point).

Individual Crypto Performance

The performance of Crypto9 assets across various timeframes (1-hour to 90-days).

🎯 What is $SARA (Sara Coin)?

$SARA (Sara Coin) is the native utility token powering the Sara AI ecosystem. It is used for:

🔐 Access to predictions & API
🗳️ Governance (1 $SARA = 1 vote)
🎮 Fantasy trading & investing games
💰 Earning 10% of all subscription fees

For tokenomics and more information see:
